[1. A1.03: Low Emissions Propulsion and Power](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:GRCParticipating Center(s):AFRC,ARC,LaRCProposals are sought which support electric propulsion of transport aircraft, including turboelectric propulsion (turbine prime mover with electric distribution of power to propulsors) and various hybrid electric concepts, such as gas turbine engine and battery combinations.Turboelectric propulsion for transport aircraft applications will require ...

SBIR National Aeronautics and Space Administration

[2. A1.04: Quiet Performance](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:LaRCParticipating Center(s):GRCIInnovative technologies and methods are necessary for the design and development of efficient, environmentally acceptable aircraft. In support of the Advanced Air Vehicles, Integrated Aviation Systems and Transformative Aero Concepts Programs, improvements in noise prediction, acoustic and relevant flow field measurement methods, noise propagation and noi ...

SBIR National Aeronautics and Space Administration

[3. A1.05: Physics-Based Conceptual Aeronautics Design Tools](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:GRCParticipating Center(s):LaRCNASA continues to investigate the potential of advanced, innovative propulsion and aircraft concepts to improve fuel efficiency and reduce the environmental footprint of future generations of commercial transports across the breadth of the flight speed regimes. Propulsion systems, such as open rotors and hybrid-electric propulsion, are viewed as potential ...

SBIR National Aeronautics and Space Administration

[4. A1.06: Vertical Lift](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:ARCParticipating Center(s):GRC,LaRCThe Vertical Lift subtopic is primarily interested in the following two areas: The use of small vertical lift UAVs has increased in recent times with many civilian missions being proposed, including autonomous surveillance, mapping, etc. Much of the current research associated with these vehicles has been in the areas of electric propulsion, batterie ...

SBIR National Aeronautics and Space Administration

[5. A1.07: Efficient Propulsion & Power](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:GRC For 2014, this sub-topic will focus on propulsion controls and dynamics. Propulsion controls and dynamics research is being done under various projects in the Fundamental Aeronautics Program (FAP) and Aviation Safety Program (ASP). For turbine engines, work on Distributed Engine Control (DEC) and Active Combustion Control (ACC) is currently being done under the Aeronautics Science ...

SBIR National Aeronautics and Space Administration

[6. A1.08: Ground Testing and Measurement Technologies](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:LaRCParticipating Center(s):GRCThis subtopic supports the experimental modeling and simulation requirements of NASA's Aeronautics Research Mission Directorate, as well as the testing requirements of other government and commercial entities. The subject facilities are managed by the Aeronautics Evaluation and Test Capability (AETC) Project within the NASA Advanced Air Vehicles Program. ...

SBIR National Aeronautics and Space Administration

[7. A1: Air Vehicle Technology](#)

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

The Air Vehicle Technology topic solicits cutting-edge research in aeronautics to overcome technology barriers and challenges in developing safe, new vehicles that will fly faster, cleaner, and quieter, and use fuel far more efficiently. The primary objective is the

development of knowledge, technologies, tools, innovative concepts and capabilities needed as the Nation continues to experience growth ...

SBIR National Aeronautics and Space Administration

8. [A2.01: Flight Test and Measurements Technologies](#)

Release Date: 11-14-2014 Open Date: 11-14-2014 Close Date: 01-28-2015

Lead Center: AFRC Participating Center(s): LaRC NASA continues to see flight research as a critical element in the maturation of technology. This includes developing test techniques that improve the control of in-flight test conditions, expanding measurement and analysis methodologies, and improving test data acquisition and management with sensors and systems that have fast response, low volume, mini ...

SBIR National Aeronautics and Space Administration

9. [A2.02: Unmanned Aircraft Systems Technology](#)

Release Date: 11-14-2014 Open Date: 11-14-2014 Close Date: 01-28-2015

Lead Center: AFRC Participating Center(s): LaRC Unmanned Aircraft Systems (UAS) offer advantages over manned aircraft for applications which are dangerous to humans, long in duration, require great precision, and require quick reaction. Examples of such applications include remote sensing, disaster response, delivery of goods, agricultural support, and many other known and yet to be discovered. In addition ...

SBIR National Aeronautics and Space Administration

10. [A2: Integrated Flight Systems](#)

Release Date: 11-14-2014 Open Date: 11-14-2014 Close Date: 01-28-2015

One of the greatest issues that NASA faces in transitioning advanced technologies into future aeronautics systems is the gap caused by the difference between the maturity level of technologies developed through fundamental research and the maturity required for technologies to be infused into future air vehicles and operational systems. Integrated Aviation Systems Program's (IASP) goal is to demonstrate ...
